Risk Logic

RMIS 2.0

Smarter risk information.

Simpler recommendation management.

An integrated Risk Management Information System keeps all inspection information in one place for real-time data at your fingertips.

Manage recommendations

Track ownership, priority, cost to implement, and status at a glance.

Dashboards built for you

Customize dashboards for individual users and the decisions they need to make.

Controlled access

Set access levels to protect and share your company's data appropriately.

Turn inspection data into clearer action with RMIS 2.0.
