

E&S Inspections

Risk Logic is now conducting Excess and Surplus (E&S) inspections utilizing a network of over 100 engineers and risk consultants spread across the U.S. Our company has been providing large commercial property inspections since 1997. With the addition of E&S, we can offer inspection expertise for any size commercial property.

Risk Logic Customers:

► Direct Clients

RLI works closely with Risk Management to provide enterprise-wide loss prevention services.

► Insurance Carriers

RLI can supplement an Insurance Carrier's loss control department by conducting loss prevention inspections, account review work and plan reviews.

► Insurance Brokers

RLI provides loss prevention reports for marketing purposes.

Risk Logic History:

Since 1997 we have been providing quality engineering and property loss prevention services that constantly exceed our customer's expectations.

Risk Logic Deliverables:

- Unbundled Risk Consulting

Commercial Property Inspection Network

Risk Logic offers a global network of experienced engineers. The map above shows the company's U.S.-based network of engineers and risk consultants available for E&S and Large Commercial Property inspections.

Risk Management Information System (RMIS):

With our new online RMIS, clients can access real time information on all account or portfolio locations, along with online location mapping capabilities, surveyed location report database, easy data mining (for COPE information, risk improvement recommendations, risk scoring, and Nat Cat data), as well as interactive recommendation response and impairment management.

The RMIS portal is a secure cloud-based database utilizing Microsoft SharePoint data encryption with personal password protected user access. User provisioning is managed by Microsoft Azure Active Directory.
